

REMARKS

Claims 1-14 are pending in this case. Claims 1-14 have been objected to and have been indicated as allowable. Claims 1 and 8 have been amended to comply with the Examiner's suggestions and as approved in phone calls to the Examiner on November 30, 2004 and December 30, 2004. No new matter has been added.

While the Examiner did not address claim 14 in the Office Action, it is believed that this claim is also in condition for allowance as it depends from claim 8 which has been amended and was indicated as being allowable.

All claims now in the application are deemed patentably distinguishable over the art applied and noted, but not relied upon. Accordingly, allowance of the application is solicited.

Respectfully submitted,

Claims 1-13 are objected to because of the following informalities: in the last paragraph of claims 1 and 8 the cutting leg should be recited as severing the wire to an appropriate length, to better clarify the fact that the cutting leg does not merely partially pierce the wire. Appropriate correction is required.

Claims 1-13 contain subject matter which defines over the art of record.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record discloses or teaches an RJ-type connector having a conductive attachment element with a cutting leg that severs the wire to an appropriate length and creates an electrical connection between the wire and the conductive attachment element.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary F Paumen whose telephone number is 571-272-2013. The examiner can normally be reached on Monday-Thursday.
